## ECO SPARKS – IGNITING CHANGE IN DOUAR HICHER

The project aims to empower young people in Douar Hicher (Manouba) to become active agents of ecological justice and positive community change. It responds to a simple yet powerful idea: when youth are trusted, equipped, and supported, they can transform their environment and their future.

The initiative brings together creativity, sustainability, and civic participation to help reimagine life in a marginalized area, with youth leading the way. The target group includes around 60 young people aged 16 to 30.
